## Statement

User Experience Designer with a focus on building customer-centric products and processes.

## Projects

### Front-end Development ([Online Portfolio](#))

- Implemented principles of HTML, CSS and JavaScript to build my portfolio site which enables me to showcase my work.
- Used best practice techniques such as mobile-first, responsive design and progressive enhancement to create a webpage that is accessible on all devices.
- Researched the latest trends in web design to attract more traffic on the site.

### UX/UI Design ([Olive:Behance](#))

- Applied all stages of design thinking to develop a mobile app that solves user problems regarding fitness sustainability.
- Conducted research to determine the business requirements and user pain points addressing them throughout the design process.
- Created and moderated user tests for prototype iterations of different fidelity levels.
- Adhered to Material Design principles when creating the UI ensuring accessibility, intuitive navigation and avoiding cognitive load.

## Other Work Experience.

### Lead Pharmacy Technician

- Managed and trained a team of technicians to ensure patients received their appropriate medication on schedule. Maintained regulatory compliance standards while running medication compounding processes.
- Communicated with all members of the pharmacy team to ensure delivery of high quality work leading to customer satisfaction.
- Developed a high level of attention to detail which is required in the medical field leading to decrease in complaints.
